A DOLLAR MAY BE YOUR DEED TO A CORNER LOT
IN THE CITY OF KINDNESS TO LITTLE CHILDREN

SPECIAL TO READERS—Please note this report is perforated, so that leaves
can be separated and distributed to Public and Sabbath School Children.

The snows of winter would lie deep on the grave of many a little life, if there were no friends to help The Hospital with their money, and no Hospital to help the children with its mercy.

AN EMERGENCY CASE.

First aid to a little girl, eight years old, whose skull was fractured while playing beside a lumber pile, which toppled and fell on her.

ONE OF THE NEW BALCONIES.

Nearly every ward in the remodelled Main Building has these open balconies, where many of the frail tots sleep all the year round.

THIS IS ONE OF OUR NEW WARDS.

THE BABY MEDICAL.

This is a lovely ward. It has cots for 30 patients. At the south end you see the opening to the balcony. To the right in this picture is a fine sun-room. During 1913 there were 415 babies treated in this ward. Do you realize what that means to the child-life?

Can you help us? There is crying need. We strive to give new life, renewed health, to ease the pain of little children.

A DOLLAR IS NOT MUCH TO YOU—BUT IT MEANS
A LOT OF HEALTH TO A LITTLE CHILD

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto.

CHILDREN HAVE A FRIEND IN EVERY HEART,
AND THE HOSPITAL NEEDS A FRIEND IN EVERY
POCKET. HAVE THEY ONE IN YOURS?-- -- -- --

THE TWINS

Both Bow Legs, in plaster, now much improved.

AN IDEAL HOSPITAL.

The work of the Hospital has increased by leaps and bounds. The remodelling of the main wing and the erection of the new wing gives the Staff the best appointed Hospital for Sick Children in the world. There is no Hospital of its kind that can show a greater record of good work done. There are 31 physicians and surgeons on its staff, all of whom give their services free of cost to the Hospital all the year round.

A PET OF 1913.

FEEDING A BABY
In the Baby Ward.
Each Baby Ward
has six nurses.

STARTLING FIGURES.

There were 415 last year; average 33 per day; average stay 12 days. Each baby was fed 6 times daily, or 198 feedings per day, or 72,270 per year. Each feeding took 15 minutes, six feedings 90 minutes or 1½ hours per day for each baby, or 49½ hours for 33 babies. 49½ multiplied by 365 days gives 18,067 hours, which divided by 24 gives 752 days. 19 hours occupied in feeding 33 babies daily for year.

AFTER TYPHOID
"I'm just waiting
for mother."

DAUGHTERS ARE THE DAWN—DEATH IS THE DARKNESS.
YOUR DOLLARS CAN LIGHT A DAWN OF HEALTH AND HOPE
IN THE NIGHT OF SOME CHILD'S SUFFERING, SOME MOTHER'S
SORROW -- -- -- --

**THE DEAR HOME FACES WHEREUPON
THE FITFUL FIRELIGHT PALED AND SHONE**

Think of the little faces that smile in the light of your own hearth, and help the Hospital to bring back little ones rejoicing to the light of humbler homes.

A GLIMPSE AT THE DENTAL ROOM

EVERY IN-PATIENT HAS HIS TEETH EXAMINED.

This lad of ten years is having a cavity in a tooth drilled by the dentist. He had more troubles than one, for he had his right collar bone removed and a knitting needle substituted for the collar bone—a marvel in surgery.

ONE OF THE CLASSES IN THE SCHOOLROOM.

Our public school teacher has done splendid work. Last year 359 children attended—average 30 per month. The teacher also instructs all the bed patients.

THE HOSPITAL FOR SICK CHILDREN

A RECORD YEAR FOR THE CHARITY

The Story of Loving Work in Conserving the Child Life of Ontario.

A Booklet for Every Man and Woman—For Every Boy and Girl in This
Great Province.

The makers of books for popular consumption are in a class by themselves. They have none of the difficulties that the writers of Hospital Reports must face.

The writers who put their names to books which they invite the world at large to read, especially in the line of fiction and other popular literature, have a world of material at their disposal. The realms of history, ancient and modern, can be drawn upon, and the incidents and vicissitudes of life as recorded in the daily press, are under tribute to the writer who puts in cold type whatever he has to say between the two covers of his book.

If the product of the book-maker be attractive the volume may run into many editions, or may see its finish in its first, as it looks appealingly at buyers from the shelves of the second-hand men whose specialty is buying "remainders" at prices that would hardly pay for the golden lettering that decorates the covers of the volumes.

Now the writer of a Hospital record cannot draw upon his imagination and he cannot gather material from history or from fiction. No, he has to compile and put in story form facts and figures from statistical documents that look as uninviting as a file of government blue books stacked on shelves in editorial sanctums. Nevertheless, let it be said, that a lot of entertaining matter—most readable and valuable—can be extracted from these same volumes. And by the same token in this official literature are included the statistics that show the yearly results of Hospital work.

In popular literature the author seeks a publisher, and generally gets one. But in the publication of Hospital reports, the charity is not only its own publisher, but is more generous than the conventional publisher, for it gives in cold type, in well-printed form, and free of cost, the story it has to tell.

In return for this free-will offering all that this, or any other Hospital asks, is that the receiver of the booklet will read it and try and digest the human story that it contains.

Then, if the reader be impressed, he will perhaps remember that if the Hospital is to continue its great work, it must have money, and that even so small a sum as a dollar will help the Hospital to lift the burden from the mother of some ailing little one.

The foregoing is just a general introduction to the appeal for aid which has been made by the Trustees for funds to carry on the work of the Hospital.

There is no work of humankind that has a better claim upon the people at large than the work that this Trust is in charge of. If every human heart be human, then this charity ought to have a corner in the heart of every man, woman and child in this Province.

No one outside of those who are actually within sight of this work can realize the tremendous responsibility of the score of officials who hold watch and ward over the one hundred and thirty-one children that are lying in the beds and cots of this Hospital—for one hundred and thirty-one is the daily average—the total for the year being sixteen hundred and forty-eight.

A SPECIAL WORD TO THE READER.

Do you, the reader of this booklet, realize that the doors of the Hospital never close, that the money you give puts a new latch-string on the door of the Hospital's mercy, and that your latch-string may be grasped by the pain-worn fingers of a little child?

The statistics in this report are really most readable. They tell the story of the work done, of the thousands of little ones from all parts of the Province who would now be in their graves had it not been for the work of the Hospital.

The progress of the Hospital in its loving work may be told in a single paragraph: Thirty-eight years ago (1875) there were 44 in-patients and 67 out-patients. Last year, 1912-13, there were 1,648 in-patients and 25,507 out-patients. There is no Hospital in the British Empire with such a record.

EXTENSION OF HOSPITAL BUILDINGS.

Since the issue of the last Annual Report, the extensions proposed in that report have been almost completed. The wing and the alterations in the main building have been erected at a cost of about \$300,000, of which \$250,000 was a grant from the Corporation of Toronto, voted by the ratepayers of the city.

Space in this report does not permit of a detailed notice of the improvements. It is proposed to issue at a later date a description of the new wing and the re-modelling of the main building.

Briefly it may be said that in the opinion of the surgical and medical staff the improvements are ideal. The new wing is, in fact, laid out on exactly the same lines as the Pasteur Hospital in Paris, into glass cubicles for individual patients, so that patients are absolutely isolated, and all danger of cross infection eliminated. In cases of infection the parents are not allowed to enter these cubicles, but may see their little ones from the balconies on each side of the building.

The new out-patient department, connected with the new wing, has six clinic rooms, operating rooms, and rooms for orthopedic work.

THE FIGURES FOR THIRTY-EIGHT YEARS.

Since 1875, thirty-eight years ago, the Hospital has admitted within its walls 21,018 children as in-patients, and 159,231 as out-patients, a total of 180,249, or an average of 4,743 per year.

Of the 21,018 in-patients, 15,200 were from Toronto, and 5,818 from other parts of the province.

Of the 21,018 in-patients, 9,218 were girls, and 11,800 boys.

Of the 159,231 out-patients, 72,838 were girls, and 86,393 boys.

Of the in-patients, 10,150, or 48¼ per cent., were cured; 6,367, or 30¼ per cent., were improved; 1,569, or 7½ per cent., were unimproved; and 1,826, or 8¾ per cent., died. Patients in the Hospital at the end of each year make up the remainder.

Just note the growth. In 1875, 44 in-patients were treated. In 1913, the past year, 1,648 in-patients were admitted, and 25,507 out-patients treated. In 1875, the weekly average number of in-patients treated was 6. Last year, the daily, not weekly, average number was 131, an increase that is a marvel to hospital workers of to-day.

A GLANCE AT THE PAST YEAR'S WORK.

Last year—a year of growth—from the 1st of October, 1912, to 30th September, 1913, there were 1,648 treated as in-patients, 714 girls, 934 boys, an increase of 354 as compared with the previous year. To the medical wards, 920; to the surgical wards, 728.

The largest number of in-patients treated in any one day in 1913 was 185; the smallest, 80; daily average, 131.

In the Out-Patient Department, or Free Dispensary, 25,507 patients were treated, 11,954 girls, 13,553 boys, an increase of 7,645 over 1912.

THE RESULTS OF TREATMENT, 1913.

Of the 1,648 in-patients treated during the year, 506, or 30¾ per cent., were discharged cured; 656, or 39¾ per cent., discharged improved; 94, or 5¾ per cent., discharged unimproved; 256, or 15½ per cent., died; and 136, or 8¼ per cent., remained in the Hospital.

The large death rate, 15½ per cent., is due chiefly to two causes—the greater number of infants admitted, and the larger number of severe intestinal and malnutrition cases.

Of the 256 deaths 122 were girls and 134 were boys; 22 patients were in the Hospital less than 2 hours; 33 patients in the Hospital less than 8 hours; 97 patients in the Hospital less than 7 days; 52 patients in the Hospital less than 21 days; 16 patients in the Hospital less than 4 weeks; so that 86 per cent. of the 256 were practically beyond hope when admitted.

Of the 25,507 in the Out-Patient Department or Free Dispensary, the staff claim that 20,405, or 80 per cent., of those who received treatment were cured, and at least 10 per cent. were improved.

NATIONALITY AND RELIGION OF IN-PATIENTS.

Of the 1,648 in-patients, 882, or 53½ per cent., were from Canada; 377, or 23 per cent., from England; 29, or 1¾ per cent., from Ireland; 65, or 4 per cent., from Scotland; 16, or 1 per cent., from the United States; and the remainder, 279, or 16¾ per cent., from foreign countries.

Of the 1,648 in-patients, 1,236, or 75 per cent., were Protestants; 187, or 11½ per cent., Roman Catholics; 225, or 13¾ per cent., other religions.

AGE AND SEX OF PATIENTS.

Of the 1,648 patients in the Hospital last year 714 were girls, and 934 boys. In 1912 there were 557 girls and 737 boys.

392 were under one year; 129 one to two; 114 two to three; 119 three to four; 103 four to five; 91 five to six; 86 six to seven; 102 seven to eight; 90 eight to nine; 110 nine to ten; 99 ten to eleven; 75 eleven to twelve; 57 twelve to thirteen; 44 thirteen to fourteen; 37 fourteen to fifteen.

THE DAYS' STAY IN HOSPITAL OF EACH PATIENT.

The number of days of Hospital treatment for 1913 was 51,592. For 1912 the number of days was 52,565. The average days' stay of each patient for the year 1913 was 32. - In 1912 the average was 40.

We find the average days' stay by dividing the total number of in-patients, 1,648, into the total days' stay, 51,592, of all patients in the Hospital.

COST PER PATIENT PER DAY.

In 1913 there were 1,648 patients in the Hospital for 51,592 days, an average of 32 days each, at a total cost of \$101,696.18. In 1912 there were 1,294 patients for 52,565 days, an average of 40 days each, at a total cost of \$104,474.84. The total days were 973 less than the previous year.

The cost of each patient per day in 1913 was \$1.97, or \$63.04 for the 32 days' stay of each patient.

In 1912 it was \$1.98¾, or \$79.50 for the 40 days' stay of each patient.

The cost per patient per day is arrived at, by adding all the days that each patient has been in the Hospital from October 1st, 1912, until September 30th, 1913—the official year—and then dividing the days into the total expenditure.

THE SURGICAL SERVICE.

Last year the number of operations performed was 1,780; in the In-Patient Department 517; in the Out-Patient Department 1,263, besides many minor operations not recorded. In 1912 the records show 1,307 operations performed; on In-Patients 496; on Out-Patients 811.

For the new operating department, the entire upper storey of the Hospital was remodelled and now consists of: 2 large operating rooms, general and emergency, surgical dressing room, sterilizing room, instrument room, a nurses' workroom, the surgeons' locker and dressing rooms, and dental room.

OUT-PATIENT DEPARTMENT AND FREE DISPENSARY.

The total visits during the past year was 25,507, of whom 11,954 were girls and 13,553 boys. The average daily attendance for the year was 82.

The largest number of out-patients treated in any one day in 1913 was 100; the smallest, 64; daily average, 82.

Of the 25,507 patients treated, there were 2,540 opthalmic or eye, 4,356 ear, nose and throat, 1,276 orthopedic, 2,582 tubercular, 7,193 medical, and 7,560 surgical cases.

In the Dispensary there were 37,950 prescriptions or orders filled, including daily solutions, ward requisites and chemicals.

The new wing, including the Out-patient Department and new Dispensary, is now well under way, and its completion at an early date will aid in relieving the over-crowded condition of the Out-patient Department.

A comparison with the previous year shows that there has been an increase of 7,645 in the number of patients attended to in the Dispensary, a difference of 1,713 in the number of new cases, and of 5,932 in the total number of patients treated.

NOT A LOCAL BUT A PROVINCIAL INSTITUTION.

There were during the year, outside of the City of Toronto, 323 patients admitted from 206 places in Ontario.

In 1912 there were 341 patients from 218 places in the Province.

THE ORTHOPEDIC DEPARTMENT AND APPLIANCE SHOP.

Of the 1,648 in-patients who received treatment in the Hospital last year 278 were treated for deformities, including the following: 25 hip disease, 37 Pott's disease, 2 knock-knees, 19 bow legs, 62 club-feet, 8 lateral curvature of the spine, 44 infantile paralysis, 6 wry neck, 75 tubercular disease of the knee, hip and ankle.

The Surgical Appliance Shop in connection with this department is maintained for the purpose of affording to patients the means of obtaining at cost the splints and appliances necessary for their treatment.

Among the appliances manufactured last year for in-patients, out-patients and private patients are the following:—30 braces for spine, 32 hip splints, 9 knock-knees, 45 ankle braces, 60 leg supports, 32 club feet splints, 100 flat foot plates, 10 bow leg splints, 40 night splints, 25 Thomas knee splints, 25 frames, 15 plaster and 4 aluminum jackets.

THE GYMNASIUM.

To perform the duties and hard work that is expected of nurses, in the probationary period, they must live under the best sanitary conditions with good food, well-ventilated rooms, baths, gymnastic exercises, so that they may be well equipped for their arduous profession.

To meet these needs, a gymnasium was installed in the nurses' residence, where the instructress gives daily to the pupils in the preliminary term thirty-minute lessons, including Swedish movements and apparatus work, besides swimming lessons, miscellaneous exercises and corrections to nurses in training.

The class conducted in the Hospital in corrective gymnastics is of great value to the Orthopedic Department. The treatment for lateral curvature of the spine has been conducted with wonderful results.

MASSAGE.

Massage has wonderful results. Help us to extend its dominion over pain.

Among the cases treated were little patients with club feet, rickets, infantile paralysis, fractures, St. Vitus' Dance, lateral curvature of the spine.

Last year 445 in-patients received massage treatment; the daily average number of patients treated being 17.

X-RAY AND PHOTOGRAPHY.

The following figures show the variety of work done the past year for in-patients, out-patients, private patients:—2,120 skiagraphs made, 110 X-Ray treatments for different diseases, and 200 fractures reduced under the rays.

The work of the X-Ray Department has been increased, and many interesting and instructive plates of pathological conditions and malformations, as aids to diagnosis, have been prepared, and are kept filed for reference.

The following figures show its usefulness for diagnosis in both surgical and medical cases:—380 dislocations and fractures, 98 hip cases, 156 bone diseases, 580 chest and lung conditions, and 72 foreign bodies discovered.

With our new X-Ray accommodation, it has been possible to extend the application of X-Ray studies previously made in the diagnosis of pulmonary diseases. The majority of these skiagraphs, viz., 580 chest and lung conditions, are cases of suspected tuberculosis in children.

THE HOSPITAL'S SUMMER HOME—THE "LAKESIDE."

There were 318 patients cared for at The Lakeside Home for Little Children at the Lighthouse Point, Toronto Island, last summer. This makes a total of 5,931 children who have been admitted since the erection of this branch in 1882. The Home was opened in May, and closed in October.

The fresh and invigorating air creates a healthy appetite, and induces restful and refreshing sleep. The beautiful situation of The Lakeside, its broad verandahs, balconies and shelters, its 9 acres of ground, all tend to make the resort one of the most healthful of sanitariums.

THE PREVENTORIUM FOR CHILDREN.

The Preventorium is on the grounds of The Lakeside Home, Toronto Island. It has 50 beds, and last summer, from May to October, 120 patients—58 girls, 62 boys, who, with care, will escape tuberculosis—were nursed. Since the opening of the Pavilion in 1910, 298 patients have been admitted.

The Preventorium is supported by the Daughters of the Empire. The Hospital supplies the Pavilion and the attending nurses, while the Daughters of the Empire defray the cost of maintenance.

THE SCHOOLROOM.

The schoolroom at the Hospital is part of the Public school system of Toronto, and is maintained by the Public School Board of the city.

It was opened in 1892. It had this year on its register 359 children, or an average monthly attendance of 30.

Also during the school term at the Island there was a separate class for the patients in the Tubercular Pavilion, and this out-of-door school is a novelty to both teacher and children.

THE TRAINING SCHOOL FOR NURSES.

This year we graduated a class of 18 nurses, making our number of graduated nurses 271 since the school was established in 1886.

The number of applicants during the year was 200, of whom 50 were accepted; 16 probationers entered the school.

DIETETICS IN THE HOSPITAL.

A six weeks' course in the Diet Kitchen at the Residence is given to the Probationary Class by the Resident Dietitian, who holds a diploma from the Domestic Science Training School.

There is also a cooking class and supervised work in the Hospital Diet Kitchen for the junior and senior nurses.

The entire culinary department is under the supervision of the Dietitian, who is responsible for all diets, both general and special.

The Dietitian in charge of the special diet department must know the chemistry of food, the physiology of the digestion, and must know how to apply these sciences in order to aid the doctors.

THE VISITING OR DISTRICT NURSE.

Statistics are essential in every line of work, but the importance of the work of our District Nurse cannot be gauged by figures. The following will, however, give an idea of the yearly routine: 7,800 visits made in 1913, or an average of 150 per week. The number of patients visited was 900.

This Hospital is the first in the world to provide a motor service for its District Nurse. A friend, a year ago, presented the Institution with an excellent motor-car, and the results have been most satisfactory. Prior to the use of the motor, the nurse made her visits by street car, and short and long walks to homes, and the daily average number of visits was from ten to twelve. But with the motor, the nurse now makes from thirty-five to forty visits a day, and has covered as high as forty-two miles of streets in making her rounds.

Much activity and interest has been awakened among the various mothers, who before have had little or no knowledge of how to care for their children.

The daily visits to the homes have carried comfort and cheer to hundreds of patients, and in many cases have changed the whole outlook of their future by the help—easily given by the nurse—but impossible for the mothers to accomplish alone.

THE PASTEURIZATION DEPARTMENT.

The new Milk Laboratory is complete, and occupied. With its modern and complete equipment, the work of this department will be done quickly and satisfactorily.

The year's work: 150 gallons of milk pasteurized daily; 1,700 bottles of milk distributed daily; 755 bottles of Baby Feedings prepared for outside babies daily, a daily average of 100 babies.

With regard to infant mortality in our city, specialists on this subject have found that death from malnutrition, and many of the stomach and intestinal disorders, which are promotive of carrying off children under one year of age, results from the inferior quality of milk, with which such infants are supplied, and statistics from hospitals prove that the better quality of this food, the lower the death rate.

THE PATHOLOGICAL DEPARTMENT.

It is hardly possible to estimate the value of the striking opportunities which present themselves along lines of chemical, bacteriological and microscopical research in a well-equipped laboratory.

The routine work is constantly increasing, and the character of the work done is more difficult. During 1913, there were 1,900 blood examinations, 3,000 bacteriologic diagnosis, 2,800 urinalyses, 925 milk examinations, 150 lumbar punctures, 81 autopsies, 100 surgical specimens examined and reported.

THE DENTAL DEPARTMENT.

The Dental Room is a new and interesting feature of our work, and is under the direct supervision of the Dentist, who spends a great deal of time in the organization of the Clinic, and practical work in the wards.

The figures of the year are as follows:—Examinations, 150; fillings, 210; treatments, 110.

NEW DEPARTMENTS AND CHANGES.

The beds for patients in the Hospital have been increased, until there are now 250 in the College street buildings and 250 at The Lakeside Home for Little Children.

The new balconies built off each ward in the College street Hospital are among the most striking improvements, not only from the nursing standpoint, but the actual well-being of the patients.

The various internal changes, such as the operating room, the re-arrangement of the kitchens, the new offices for the superintendent, the new heating plant, additional furniture and new storerooms will greatly increase the efficiency of the Hospital's work.

NEW COTS DURING THE YEAR.

The following cots have, by the payment of \$2,000, been named in perpetuity in the Hospital in College Street in 1913:—

"The Rice Lewis Memorial Cot," by Mrs. M. Lewis Gooderham, Toronto; "The Charles S. Rumsey Cot," by Mrs. Charles S. Rumsey, St. Mary's; "The Thomas Walmsley Cot," by bequest of the late Mr. Thomas Walmsley, Toronto.

The following cots, by the payment of \$100 per year, were named to be maintained annually in the Hospital in College Street:—

"The S. J. Miller and Company Cot," by Messrs. S. J. Miller & Co., Toronto; "The Bloor Street Baptist Men's Union Cot," by Men's Union Bible Class, Bloor Street Baptist Church, Toronto; "The Margaret Matilda Godson Cot," by Mr. Lionel Godson, Toronto; "The Jessie L. Garland Cot," by a friend.

The following cot, by the payment of \$500, has been named in perpetuity at The Lakeside Home, Toronto Island:—

"The Louise Blossom Gun Munro Cot," by Mr. Ernest C. Gun, Cleveland, Ohio.

The following cots, by a payment of \$25 a year, were named to be maintained annually at The Lakeside Home, Toronto Island:—

"The Harry and Grace Forward Cot," by Mrs. H. T. Forward, Belleville; "The Brussels Continuation and Public School Cot," by Brussels Continuation and Public School, Brussels; "The Atwood Chapter Cot," by Atwood Chapter, No. 149, R.A.C., Rainy River; "Employes General Mines, Limited, Cot," by Employes General Mines, Limited, Haileybury; "The South Middleton Epworth League Cot," by Epworth League, South Middleton; "The St. Andrew's Windsor Cot," by Adult Bible Class, Windsor, Ont.; "The Sunshine Cot," by Sunshine Club, Inglewood; "The Mrs. Annie Mackay Cot," by bequest of the late Mrs. Annie Mackay, Toronto.

BEQUESTS IN THE YEAR.

The Trustees acknowledge with thanks bequests from estates of:

R. R. Newborn, New Toronto, \$13,422.96; Richard Maloney, Toronto, \$1,400; Henry James, Brantford, \$250; Mrs. M. A. Simpson, Toronto, \$1,199.31; E. A. Foster, Toronto (for cot), \$150; J. S. Canner, Colborne, \$70; W. Kew, Toronto, \$200; H. Woods, Aylmer, \$79.09; H. Goulding, Toronto, \$62; C. Woodward, Toronto, \$2,751.67; W. B. Tisdale, Orillia, \$1,000; Mrs. Laura McAndrew, Toronto, \$250; Dr. Daniel Clark, Toronto, \$2,000; Mary E. Grant, Toronto, \$100; Wm. Warren, Toronto, \$210; J. Helm, Port Hope, \$1,000; James Clark, Toronto, \$3,657.82; Mary Hooey, Thornbury, \$20; J. Herbert Mason, Toronto, \$361.11; E. M. L. Jackson, Tilbury, \$16.59; S. Thompson, Niagara Falls, \$527; W. Maclean, Toronto, \$500; J. D. Carscallen, Jersey City, N. J., \$25; C. Durant, Chesterville, \$100; J. S. Moran, Toronto, \$1,000; J. L. Blaikie, Toronto, \$500; D. McTaggart, Alvinston, \$100; S. Nordheimer, Toronto, \$500; Jane McBride, Toronto, \$63.50; James Hewitt, Orangeville, \$500; Ann Charlton, Toronto, \$100; E. F. Rush, Toronto, \$100; Joseph E. Westcott, Ailsa Craig, \$150.

RESIGNATION OF OUR SUPERINTENDENT.

It is with deep regret that the Trustees have to announce that Miss Louise C. Brent, who for the past sixteen years has held the office of Superintendent of the Hospital, has resigned her position. Miss Brent has during her years of service been an untiring worker, faithful to her trust, with a single eye to fulfilling the responsible duties which she had to perform in the work of the institution. In accepting Miss Brent's resignation our best wishes go with her, and our hope is that in her married life she may enjoy long years of health and happiness.

The Trustees have appointed Miss Florence J. Potts, who has for many years been Assistant Superintendent, to the position held by Miss Brent. Miss Potts has had long experience in nursing work, and is recognized by the profession as a woman of large executive ability and one who will be a worthy successor to our late Superintendent.

RECEIPTS AND EXPENDITURE.

The receipts applied to maintenance account last year were \$98,795, while the expenditure on the same account was \$101,696—a deficit of \$2,900. In 1912 the receipts were \$95,685, with an expenditure of \$104,474, a deficit of \$8,789 on maintenance account. It is the deficit that tells so heavily in the cost of maintaining the Hospital. The deficit is always with us—it's like an old friend. Our expenditure may be less in one year and more in another, but the receipts have never yet exceeded the expenditure. It was a fortunate thing for the Hospital that we were able to secure some of the staple articles of food by contract last year at a much less price than in 1912. This helped us out and decreased the expenditure \$2,778. The financial statement in this report shows every detail of expenditure. Absolute economy governs this Hospital in the conduct of its business, and for every dollar expended full value is received.

THIS APPEAL IS FOR YOU—WILL YOU HELP US?

YOUR PURSE IS THE HOSPITAL'S HOPE.

Your money lights the candles of mercy on the Christmas trees of health that the Hospital plants along the troubled pathway of many a little life.

The Hospital has a treasury in the hearts of the people who love little children, with a love that puts cash into the outstretched arm of the Hospital's mercy.

YOU LOSE MONEY, while the doctors and nurses, they lose sleep, in their services, the splendid soldiers of the Hospital's mercy keeping vigil by the cot of the child who has won back health and life BY THE KINDNESS OF YOUR CASH.

THE OPEN PURSES OF THE HOSPITAL'S FRIENDS is the hope of the Hospital at Christmas, just as THE OPEN DOOR OF THE HOSPITAL'S MERCY IS THE HOPE OF THE LITTLE CHILDREN THROUGHOUT THE YEAR.

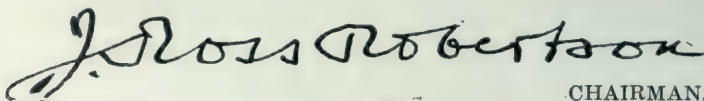

Your money cannot travel the path to the Hospital's treasury without saving some little child from treading the path to the graveyard.

The Ministry of Healing to the Little Children is the burden that can be lifted from the Shoulders of the Hospital's Mercy by the Might of your Money.

CHRISTMAS CAROLS OF CASH WRITTEN ON THE NOTES OF YOUR CONTRIBUTION MAKE THE MUSIC OF HEALTH AND HEALING THAT SINGS IN THE SERVICE OF THE HOSPITAL TO LITTLE CHILDREN THROUGHOUT THE YEAR.

For the Trust,

J. ROSS ROBERTSON, E. B. OSLER, GEORGE A. COX, JOHN FLETT, J. STRACHAN JOHNSTON,	}	Trustees.

CHAIRMAN.

THE NURSES, YES THE NURSES, GOD'S OWN DAUGHTERS, WHO NIGHT AND DAY, FROM YEAR END TO YEAR END KEEP WATCH AND WARD, AND BY THEIR CARE BRING BACK FROM THE GRAVE TO HOME AND HEALTH THE HELPLESS LITTLE ONES COMMITTED TO THEIR CARE --: --: --:

A GROUP OF THIS YEAR'S NURSES.

There are 70 nurses in training, under supervision of expert teachers and lecturers. The course is three years. The nurses live in the Residence, a modern building with perfect equipment. Each nurse has a separate room. The best food is provided—every provision for comfort. Every floor has rest and study parlors, bathroom and lavatories, all up-to-date. Fine swimming pool and gymnasium; music, writing, lecture rooms, and extensive nursing and general library. The nurses' library is the only one of its kind in the world, for it has 500 volumes—every book on nursing printed up to August, 1913. Visitors to Toronto are invited to visit the Hospital and Residence.

X-RAY ROOM.

Taking a sciagraph of lungs in a case of pneumonia, so as to see the portion of lung diseased.

STERILIZING ROOM.

Nurses sterilizing dressings, basins, instruments and solutions for work in operating room. Complete modern sterilizer.

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto.

THE HOSPITAL FOR SICK CHILDREN, TORONTO.

AUDITORS' REPORT, HOSPITAL FOR SICK CHILDREN.

To the Chairman of the Trust :—Dear Sir,—We beg to certify that the Receipts and Disbursements of the Hospital for Sick Children have been carefully audited with the vouchers and bank account throughout the year ending Sept. 30, 1913, and the accompanying statements of Income and Expenditure and Assets and Liabilities, bearing our signature, are a true and correct account of the affairs of the Hospital to that date. The books and work of the office are well looked after, and all desired information has been freely given.

Respectfully submitted,

Toronto, Oct. 17, 1913.

A. C. NEFF & CO., Chartered Accountants.

**BUSY DOLLARS ARE BETTER THAN IDLE TEARS.
THE SYMPATHY THAT HELPS IS GOOD, BUT THE
HOSPITAL HAS TO HAVE THE SYMPATHY THAT
WORKS** :- :- :- :- :- :- :- :- :-

THE LAKESIDE HOME FOR LITTLE CHILDREN, AT THE
LIGHTHOUSE POINT, TORONTO ISLAND.

The summer home of convalescent patients from the mother Hospital in College street. Nurses and patients on the lawn in front. The main building has beds and cots for 150, and 10 broad balconies on which children sleep in the open from May till October; also one Pavilion and one Preventorium for 50 children each, and an Isolation Building with 40 beds. There are nine acres of lawn. It is the prettiest and most restful spot on the Island.

THE PREVENTORIUM ON THE GROUNDS OF THE LAKESIDE HOME.

The pavilion that houses children from the Heather Club Clinic—children that have been exposed to tubercular infection, but not active cases. The Daughters of the Empire maintain this pavilion. Results are marvellous. The increase in weight of the 120 children in four months last summer was from four pounds to seventeen pounds.

**IF THE CRY OF SUFFERING CHILDHOOD COULD REACH YOUR
EARS THE HOSPITAL COULD REACH YOUR POCKETS IN LESS
TIME THAN IT TAKES TO WRITE THIS WORD OF APPEAL** :-

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto.

This record of especially the last twenty-three years shows that the objection parents have had to sending their sick little ones to the Hospital has been largely overcome.

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto.

WILL YOU HELP TO GIVE CRIPPLED CHILDREN A FAIR START IN THE RACE OF LIFE ?

What Surgery Does for Deformed Crippled Children

BEFORE

BEFORE

BEFORE

BEFORE

THE HOSPITAL HAS THE BEST OF SURGICAL SKILL FOR THE CORRECTION OF DEFORMITIES.

Do you know that the orthopedic surgeons of the Hospital for Sick Children have sent out during the past thirty-eight years nearly a thousand children who had either club or crippled feet or bow legs—and who now are walking as correctly as though they never were crippled? And these children were of poor parents who could not afford to pay for treatment.

LAST YEAR'S RECORD

278 Cases of Deformity, 25 Hip Disease, 37 Pott's Disease, 2 Knock Knees, 19 Bow Legs, 62 Club Feet, 8 Lateral Curvature of Spine, 44 Paralysis, 6 Wry Neck, 75 Tubercular Disease of Knee, Hip and Ankle.

THE SHOP FOR APPLIANCES.

Every Brace Must Be Especially
Made to Fit the Particular
Deformity.

Last year many instruments were made in the Orthopedic Shop, and included:—30 Braces for Spine, 32 Hip Splints, 9 Knock Knees, 45 Ankle Braces, 60 Leg Supports, 32

Club Feet Splints, 100 Flat Foot Plates, 10 Bow Leg Splints, 40 Night Splints, 25 Thomas Knee Splints, besides 25 Frames, 15 Plaster and four Aluminum Jackets.

Of the above, 170 were discharged cured, 419 improved, 55 unimproved, 28 died, and 61 remained in the Hospital.

Surgical cases, 433; medical cases, 841; special, 239; 136 remained in the Hospital. Total, 1,648.

W. E. ROBERTSON, M.B. } Registrars
G. BOYER, M.B.

NOTE—A large percentage of the surgical cases discharged from Hospital as improved return to the Out-Patient Department for treatment and are ultimately cured.

SURGICAL OPERATIONS.

Table Showing Nature of Surgical Operations from Oct. 1st, 1912, to Sept. 30th, 1913.

Operations.	Total	Operations.	Total
Removal of glands under arm	1	Intestinal obstruction	4
Removal of glands from neck	8	Mesenteric glands	1
Amputation of leg	1	Peritonitis, general	1
Fixation of joint	3	Wound, puncture	1
Fixation of knee and hip joints	3	Resection of bowel	2
Breaking of consolidated knee joint	1	Drainage of sinus	1
Scraping of bones	3	Manipulation of feet	8
Scraping of ulcer	1	Removal of the mammary glands	1
Drainage of mucocele	1	Operation of muscle	3
Dilation of stricture of œsophagus	2	Needling of cataract	14
Dilation of urethra	1	Osteotomy of femur	5
Examination under anaesthetic	3	Osteotomy of tibia	21
Excision of heel bone	14	Plaster cast, Abbots	5
Excision of bone cyst	1	Plaster cast, Potts	6
Excision of cyst	1	Plaster cast, wry neck	1
Excision of head of femur	1	Plaster cast, spica	12
Excision of foreign body	1	Plastic operating	7
Excision of hydrocele	1	Plating, fracture of femur	2
Excision of meningocele	4	Plating, fracture of humerus	2
Excision of small bones of foot	1	Reduction of bones of wrist	1
Excision of birthmark	4	Reduction of fracture, elbow	4
Excision of sarcoma	2	Reduction of hernia	45
Excision of polypus	2	Reduction of congenital hip	20
Excision of scar	2	Reduction of humerus, radius	7
Excision of turbinates	1	Reduction of bones of leg, forearm	5
Excision of thyroglossal duct	1	Removal of plate from bone	4
Excision of warty growths (gonorrheal)	1	Removal of foreign body	3
Excision of tubercular glands	3	Repair of cleft palate	13
Fasciotomy	4	Repair of hare lip	7
Incision of abscess	20	Repair of palate and lip	9
Incision of tubercular abscess	18	Repair of laceration of eye ball	7
Incision of abdomen	1	Resection of rib	8
Incision of joints	4	Resection of septum of nose	11
Incision of soft tissues	1	Tenotomy, repair of tendon	42
Incision of collection of blood	4	Tendon fixation, peroneal	20
Incision of imperforate anus	2	(Galle operation) achilles	2
Incision of mastoid	19	Removal of goitre	2
Incision of osteomyelitis	5	Opening of skull	2
Incision of pus in kidney	1	Transplantation of ureters	1
Abscess of back of throat	1	Removal of dead bone	2
Incision and drainage inflammation of tear sac	1	Reduction of fracture, femur	22
Removal of appendix	26	Removal of adenoids and tonsils	7
Meckels diverticulum	1	Total	517

SURGICAL OPERATIONS IN OUT-PATIENT DEPARTMENT.

Removal of tonsils and adenoids	969	Examination of nose, ear, throat	3
Removal foreign body, ear, nose, hand	4	Parasentesis	6
Removal of growth from nose, ear ..	4	Reducing fractures	28
Removal of needle from foot	2	Circumcisions	49
Removal of polypus from ear	2	Manipulations (club feet)	24
Removal of stitches from palate	1	Incising tendons (tenotomy, club feet)	16
Removal of accessory thumb	1	Injection of salvarsan	11
Removal of coin from œsophagus	1	Hydroule aspirated	3
Removal of nail from finger, toe	2	Mastoid	1
Removal of trachoma granules	1	Wounds stitched	17
Incising abscesses	79	Curretted sinus	1
Incising cervical glands	7	Curretted finger and hand	2
Incising cysts	3	Sinus probed	1
Incising warts from eye	1	Lumbar puncture	1
Incising infected hands and arms ..	5		
Incising elbow, foot, finger, leg, heel	8	Total Out-Patients	1263
Incising infected eyelids	2	Total In-Patients	517

BEFORE. AFTER.

FRACTURE OF ARM.

A boy eight years old fractured upper arm close to elbow. The plate "before" shows great displacement of the fragment. The plate "after" shows arm six weeks later. Perfect result. Now uses arm freely.

HOW CAN THE HOSPITAL CLOSE ITS HEART TO THE APPEALS THAT ARE WRITTEN IN THE TORTURED LIMBS OF SUFFERING CHILDREN, AND THE TEARS OF THE SORROWING MOTHERS? AND HOW CAN YOUR HEART BE CLOSED AGAINST THESE APPEALS THAT CAN BE ANSWERED IN \$\$\$?

Please Remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto.

Your Money is the kindly heart,
Our Mercy is the loving hand;
The Hospital will do its part,
If you the need will understand.

SURGEONS IN THE OPERATING ROOM

A CASE OF FIXATION OF HIP.

The patient is a girl of eleven years, whose legs required straightening. When admitted, the legs were about at right angles to the body. The child could not stand up. The surgeon is seen preparing the bone in order to straighten the leg. After the operation the patient walked freely, with the aid of a crutch.

Repeats	1,752
Cases treated	2,540
Nose, Throat, Ear Cases—	
New cases	1,401
Repeats	2,955
Cases treated	4,356
Tubercular Cases—New cases....	349
Repeats	2,233
Cases treated	2,582
Total	25,507

A REAL TALK WITH SANTA.
Christmas Eve, 1912.

This is a scene in one of the wards of the Hospital for Sick Children, College street, Toronto, where a friend of the Hospital played Santa Claus to the 120 sick little ones in the beds and cots. The look of wonderment, tempered with happiness on the girl's face, is perhaps mingled with awe at receiving a dolly from Santa himself. Certain it is, no Christmas season was better enjoyed or will be longer remembered than the Christmas of 1912 at the Hospital for Sick Children.

A COUPLE OF INTERESTING CASES

These are cases where the X-Ray gets in its work

BEFORE and AFTER.

"WANTED APPLES."

This lad of nine was climbing an apple tree. He fell, broke bone of upper leg. After difficult operation bone did not set. Surgeons applied steel plates with screws to hold the break in position until fragments of bone knit together.

DO YOU SEE THE BULLET?
A SAD ACCIDENT.

Boy of nine, shot by chum. He thought his pigeons were in danger and rushed between—got bullet in forehead. It travelled to base of skull. Bullet extracted, but the poor boy died, notwithstanding every effort was made to save his life.

THERE ARE SOMETIMES A DOZEN ACCIDENT CASES AT ONE TIME IN THE HOSPITAL :- :-

Please Remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto.

WHEN THE FRIENDS OF LITTLE CHILDREN CLOSE THEIR PURSES THE HOSPITAL WILL HAVE TO CLOSE ITS DOORS. THAT TIME WILL NEVER COME WHILE THE EARTH IS FULL OF LOVING HEARTS, RESPONSIVE TO THE DIVINE WORDS:

"INASMUCH AS YE HAVE DONE IT TO THE
LEAST OF THESE MY BRETHREN,
YE HAVE DONE IT UNTO ME."

DIETETICS IN THE HOSPITAL

DIET KITCHEN, WHERE NURSES ARE TAUGHT COOKING.

This department is under the direction of an expert resident dietitian. The probationary nurses' class receives a six weeks' course and learns how to prepare many delicacies for the sick room.

A SPECIAL FEATURE OF THE HOSPITAL. Its Pasteurized Milk Laboratory.

The only scientifically pasteurized milk in the Dominion of Canada. Last year in the Milk Laboratory 150 gallons of milk were pasteurized daily, 1,700 bottles distributed daily, 755 bottles of baby feedings prepared daily for outside babies—a daily average of 100 babies.

Every patient and staff resident in the Hospital Building are given pasteurized milk.

The milk we buy is certified milk. The count of this milk to the cubic centimetre runs from 1,000 to 3,000. Our plant fixes 20 minutes at 145 degrees Fahrenheit as the minimum for efficient pasteurization. After pasteurization the count is about zero.

It is tested daily by our bacteriologist, and weekly by the City Health Department. Dr. Hastings, the Medical Health Officer, and Dr. George Nasmith, Ph. D., director of the city laboratories, say that it is the best milk in Toronto.

WHAT IT COSTS TO MAINTAIN THE HOSPITAL.

For one year....	\$101,696.18
For one month..	8,474.68
For one day..	282.49
For one hour....	11.77
For one minute..	.19

Money is Mercy in Action—Mercy is Money in Response

ON THE LAWN AT THE LAKESIDE.

A FEW SURGICAL CASES.

OUR LITTLE
COLORED
FRIEND.

MISS CHARTRES
The District Nurse.
A Good Worker.
HER DAILY ROUND.

"THAT'S A
GOOD STORY
NURSE."

The District Nurse drives her motor and visits an average of 35, sometimes 40 homes daily, where discharged patients, principally babies, live. She covers 40 miles of streets between the eight miles of city east and west and four miles north and south. No service like it in any hospital in the world.
